

HASA SANI-CLOR

CHLORINATING LIQUID FOR POOL AND SPA SANITIZATION

Active Ingredient: Sodium Hypochlorite.....12.5%
 Other Ingredients:87.5%
 Total:100%

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID

IF INHALED	<ul style="list-style-type: none"> • Move person to fresh air • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth, if possible. • Call a poison control center or doctor for further treatment.
IF ON SKIN OR CLOTHING	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15 - 20 min. • Call a poison control center or doctor immediately for treatment advice.
IF IN EYES	<ul style="list-style-type: none"> • Hold eye open & rinse slowly & gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
IF SWALLOWED	<ul style="list-style-type: none"> • Call a poison control center or doctor for treatment advice immediately. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.
HOT LINE NUMBER	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-4249300 for emergency medical treatment information.	
NOTE TO PHYSICIAN	
Probable mucosal damage may contraindicate the use of gastric lavage.	

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Note: This product degrades with age. Use chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

STORAGE AND DISPOSAL

Store this product in a cool, dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not contaminate food or feed by storage, disposal, or cleaning of equipment. Return Container to dealer or distributor for deposit refund.

SWIMMING POOL WATER DISINFECTION

For a new pool or spring start-up, super-chlorinate with 52 to 104 ounces of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Adjust and maintain pool water pH to between 7.2 to 7.8. Adjust and maintain the alkalinity of the pool to between 50 to 100 ppm.

To maintain the pool, add manually or by feeder device 11 ounces of this product for each 10,000 gallons of water to yield an available chlorine residual between 0.6 to 1.0 ppm by weight. Stabilized pools should maintain a residual of 1.0 to 1.5 ppm available chlorine.

Test the pH, available chlorine residual, and the alkalinity of the water frequently with appropriate test kits. Frequency of water treatment will depend upon temperature and the number of swimmers.

Every 7 days, or as necessary, superchlorinate the pool with 52 to 104 ounces of product for each 10,000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Check the level of available chlorine with a test kit. Do not re-enter the pool until chlorine residual is between 1.0 to 3.0 ppm.

At the end of the swimming pool season or when water is to be drained from the pool, available chlorine must be allowed to dissipate from treated pool water before discharge. Do not chlorinate pool within 24 hours prior to discharge.

WINTERIZING POOLS

While water is still clear and clean, apply 3 ounces of product per 1,000 gallons of pool water while filter is running, to obtain a 3 ppm available chlorine residual, as determined by a suitable test kit. Cover pool, prepare heater, filter, and heater components for winter by following manufacture's instructions.

SPAS

Spas Maintenance Dosage: Apply 5½ oz. of product per 1,000 gallons of water to obtain a free available chlorine concentration of 5 ppm, as determined by a suitable available chlorine test kit. Adjust and maintain pool water pH to between 7.2 and 7.8. Some oils, lotions, fragrances, cleaners, etc. may cause foaming or cloudy water as well as reduce the efficiency of the product.

FOR START UP: Apply 10 oz. of product per 1,000 gallons of water (equivalent to 10 ppm available chlorine) uniformly over the surface. Make minor adjustments if necessary to establish a free available chlorine residual of 10 ppm.

FOR SHOCK TREATMENT (Superchlorination); or after each use: Add 16 oz. of product per 1,000 gallons of water to control odors and/or algae (for outdoor spas). Do not use spa until free available chlorine drops to 5 ppm or less. Use a suitable available chlorine test kit to establish proper residuals.

During extended periods of disuse add 3 oz. of product per 1,000 gallons to maintain a free available chlorine residual of 3 ppm.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

DANGER: Corrosive, may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Wear safety glasses or goggles and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated area as soon as possible. Do not return until odors have dissipated.

Environmental Hazards

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

Physical or Chemical Hazards

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals, (e.g., ammonia, acids, detergents, etc.) or organic matter, (e.g., urine, feces, etc.) will release chlorine gas which is irritating to eyes, lungs, and mucous membranes.

SHIPPING INFORMATION

This Product is classified an ORM-D material by U.S. DOT.

Empty containers and bottles must be returned to your dealer or distributor for deposit refund or credit.

Always return empty containers in the upright position with the original closure tightly affixed on the neck of the bottle.
