

AQUA AMMONIA
FOR PROFESSIONAL USE ONLY
KILLS GREEN, YELLOW, AND MUSTARD ALGAE

AQUA AMMONIA will enhance the killing action of liquid chlorine to quickly kill and oxidize green, yellow, and mustard algae.

**WARNING: LIQUID CAUSES BURNS
VAPOR EXTREMELY IRRITATING**

DIRECTIONS FOR USE:

For severe infestations of algae:

Add four gallons of **HASA Liquid Chlorine** per 20,000 gallons of pool water. Turn on pump and filter. Loosen closure of **AQUA AMMONIA** cautiously before opening. Place gallon container under pool water to open. Tip gallon container to release **AQUA AMMONIA** into pool water while bringing hand out of the water. One gallon of **AQUA AMMONIA** should treat the average residential swimming pool. Let pump and filter run a minimum of 12 hours. Brush and vacuum pool completely. Back wash and clean filter thoroughly. The swimming pool must be shocked or superchlorinated after treatment to oxidize the ammonia compounds (chloramines) and establish free available chlorine levels, these levels should return to 1.5 ppm – 3.0 ppm of free available chlorine before swimming may resume.

AVAILABLE PACKAGING:

AQUA AMMONIA is available in convenient one gallon containers only.
