

## SODIUM BROMIDE

TO ESTABLISH A RESERVE BROMIDE IN SPAS, HOT TUBS OR POOLS

**HASA SODIUM BROMIDE** is not a disinfectant.

**HASA SODIUM BROMIDE** is used when spas, hot tubs, or swimming pools are emptied and refilled with fresh water.

**HASA SODIUM BROMIDE** is needed to increase the bromine reserve in the water to insure proper sanitization.

**HASA Hi-Temp Brominating Tablets** will then be used as the sanitizer and disinfectant.

Brominating tablets dissolve too slowly to sanitize a pool or spa unless the bromide level is previously raised to a proper range for sanitation.

### DIRECTIONS FOR USE:

**HASA SODIUM BROMIDE** is recommended for use with **HASA Hi-Temp Brominating Tablets**. Add one-half ounce of **HASA SODIUM BROMIDE** per 100 gallons of spa water to establish a 30 ppm (parts per million) bromide reserve before using **HASA Hi-Temp Brominating Tablets**.

### **INGREDIENTS:**

ACTIVE INGREDIENTS: Sodium Bromide.....	99.00%
INERT INGREDIENTS:.....	1.00%
TOTAL INGREDIENTS:.....	100.00%

### **AVAILABLE PACKAGING:**

**HASA SODIUM BROMIDE** is available in a 25# pail.
