

Try adding HASA Super Stain-Out® to your acid washes. Super Stain-Out® will help the stain to release from the plaster. Just add 4 oz. of Super Stain-Out® to your acid wash solution. This Super Stain-Out® acid wash solution will amaze you with how quickly it will pull the copper stains out of white plaster. This solution will leave the plaster white after just one application. It's gentler on the plaster, and it's less labor and cost to you.
