

HI-TEMP SPA FILTER SOAK

CLEANS ALL TYPES OF FILTER CARTRIDGES

HASA HI-TEMP SPA FILTER SOAK is a deep cleaning agent to clean all types of filter cartridges either synthetic or natural.

HASA HI-TEMP SPA FILTER SOAK effectively dissolves body oils, dirt, and other impurities which are absorbed during normal filtration. With the proper use of **HASA HI-TEMP SPA FILTER SOAK** you will add to the life and to the efficiency of your filter cartridge.

DIRECTIONS FOR USE:

Remove cartridge from filter tank. Hose off visible debris. Fill a large plastic container or bucket one-third (1/3) full of water. Slowly place cartridges into the solution. When cartridges are all in the container, add enough water to completely cover the cartridges. Let cartridges soak overnight. Remove cartridges from soaking solution and rinse them repeatedly. Replace cartridges in filter. One bottle adequately cleans 50-75 foot of cartridge filter area.

Proper spa maintenance includes changing spa water. For an estimate of proper water life follow the formula below:

Divide the gallons in your spa by 3 times the average number of bathers per day.

Example: 375 gallon spa – 1 person x 3 = 3
 375/3=125 (change water every 125 days)

AVAILABLE PACKAGING:

HASA HI-TEMP SPA FILTER SOAK is available in one pint bottles.
